Install Interior Building Grounding				X	X	X	

This schedule is provided to inform the public of construction activities scheduled two weeks into the future. The Glorietta Substation will be another element in the 4kV to 12 kV distribution system upgrade. These increases to capacity allow more power to flow throughout the system, thereby increasing GWP's ability to meet customer demand. We hope that providing this schedule, we can minimize any inconveniences to the public.

Non-Working Day	Standard Hours	Weekend Hours	Holiday Hours
